JavaScript, React / Redux, Ruby, Rails, jbuilder, HTML, CSS, postgresSQL, AWS, Webpack

*Emulates popular music streaming applications such as Tidal/Spotify. Authenticated users can stream music, and create their own playlists.*

- Utilized mapStateToProps to pass appropriate slices of the redux store to components in order to avoid additional AJAX queries and render features for the user.
- Integrated Redux with HTML5 media web components to create customized media playback for users.
- Employed CSS3 flexbox with z-index and React-Modal for a compelling and flexible layout.

### Plant Press

[live site](#) | [github](#)

JavaScript, React / Redux, nodeJS, express, MongoDB, HTML5, CSS3, AWS,

*Enables users to track their plants' needs and share images and information of their collection.*

- Implemented Bootstrap framework to create a mobile oriented interface.
- Applied the Validator.js library to validate user input in the controller before saving things into a MongoDB database in order to prevent saving malformed data.

### Versus

[live site](#) | [github](#)

JavaScript, HTML5, CSS3, ChartJS

*Compares two musical artists within the visual format of a character select screen. Users choose from a pool of artists to see their head-to-head stats in a dynamic and interactive way.*

- Created unique data visualizations utilizing chartJS library for smooth UI's.
- Accomplished the project primarily using only Vanilla DOM Javascript.
